### POSITION DESCRIPTION

This position works in a manufacturing team environment to create tools, fixtures, and custom plastic components by setting up and running various types of milling machines and CNC routers. Responsibilities include but are not limited to those described herein.

### RESPONSIBILITIES

- Apply work order and tooling order instructions to machining and quality control procedures.
- Load and unload material into position. Run and inspect first part to verify proper setup.
- Set up machines according to specifications.
- Monitor product quality throughout milling and trimming processes.
- Perform minor pattern tool and fixture repairs.
- Operate forklift and various hand tools.
- Clean machines after use.
- Maintain a safe work environment according to guidelines and standards.

### PREFERRED QUALIFICATIONS

- Experience working in machining or manufacturing environment.
- Strong mechanical aptitude. Previous tool and die, mold and fixture-making, or CNC experience highly preferred.
- Ability to understand diagram instructions and apply to machining.
- Ability to use simple mathematics: addition/subtraction, multiplication/division, fractions, and decimals.

### PREFERRED ATTRIBUTES

- Self-starter. Ability to perform under pressure and thrive in a fast-paced environment.
- Effective leader. Team player with positive, flexible attitude and polished communication skills.
- Ability to prioritize daily tasks and deadlines. Detail and process-oriented.
- Dedicated work ethic.

### ABOUT LETOURNEAU PLASTICS, INC.

LeTourneau Plastics, Inc. has been a pioneer in custom vacuum thermoforming of plastic components for nearly 50 years. Using virtually 80% recycled material, the company specializes in producing and assembling high quality cosmetic parts for a wide variety of industries within the United States and internationally; transportation, aviation, agriculture, food service, lawn and garden, recreation, health care, marine, etc. The company also assists in the design of parts to reduce tooling expense and minimize cost for customers. The 140,000-sq.ft. facility in Oconto, Wisconsin includes two manufacturing plants, warehousing, office space, pattern and tooling shop with six milling centers, 15 forming machines, two 3-axis CNC routers, and nine 5-axis CNC routers. As a third-generation-owned company, success and consistent growth has developed from a commitment to building enduring relationships with customers and surrounding communities.
